MADE IN THE UNITED STATES OF AMERICA

Contents of Volume 119

Number 1, September 1989

imultaneous Hydrodenitrogenation of Pyridine and Hydrodesulfurization of Thiohene over Carbon-Supported Platinum Metal Sulfides
Z. Vít and M. Zdražil 1

eactions of Benzyl Alcohol over Oxide Catalysts: A Novel Condensation to Form nthracene
K. Ganesan and C. N. Pillai 8

MR Characterization of the Hydrogen and Deuterium Phases Present in Pd/SiO_2 atalysts
Andrew A. Chen, Alan J. Benesi, and M. Albert Vannice 14

tructural Transformation in Nb_2O_5-Promoted Rh Catalysts during Calcination and eduction Treatments
Z. Hu, H. Nakamura, K. Kunimori, Y. Yokoyama, H. Asano, M. Soma, and T. Uchijima 33

ffects of High-Temperature Oxidation and Reduction on the Structure and Activity f Rh/Al_2O_3 and Rh/SiO_2 Catalysts
Chor Wong and Robert W. McCabe 47

eactions of Aromatic Hydrocarbons over Zeolite β
P. Ratnasamy, R. N. Bhat, S. K. Pokhriyal, S. G. Hegde, and R. Kumar 65

ES and TDS Study of the Adsorption of NH_3 and NO on V_2O_5 and TiO_2 Surfaces: lechanistic Implications
J. A. Odriozola, H. Heinemann, G. A. Somorjai, J. F. Garcia de la Banda, and P. Pereira 71

xidation of Benzoic Acid to Phenol in the Vapor Phase. II. Copper Catalysts
M. Štolcová, M. Hronec, and J. Ilavský 83

reparation and Thermal Properties of Zr-Intercalated Clays
F. Figueras, A. Mattrod-Bashi, G. Fetter, A. Thrierr, and J. V. Zanchetta ... 91

lumina-Supported Bimetallics of Palladium Alloyed with Germanium, Tin, Lead, r Antimony from Organometallic Precursors. I. Preparation and Characterization
Hugo R. Aduriz, Pedro Bodnariuk, Bernard Coq, and François Figueras 97

uantum Chemical Study of the Electronic Structure and Geometry of Surface lkoxy Groups as Probable Active Intermediates of Heterogeneous Acidic Catalysts: Vhat Are the Adsorbed Carbenium Ions?
V. B. Kazansky and I. N. Senchenya 108

ormation of Crystalline Compounds and Catalyst Deactivation during SO_2 Oxidaon in V_2O_5–$M_2S_2O_7$ (M = Na, K, Cs) Melts
S. Boghosian, R. Fehrmann, N. J. Bjerrum, and G. N. Papatheodorou..... 121

lethane Conversion and Fischer–Tropsch Catalysis over MoS_2: Predictions and nterpretations from Molecular Orbital Theory
Alfred B. Anderson and Jenwei Yu 135

ntering of Platinum-Black in Hydrogen: Morphology and Catalytic Activity
Zoltán Paál, Helga Zimmer, John R. Günter, Robert Schlögl, and Martin Muhler 146

Methane Oxidative Coupling. II. A Study of Lithium–Titania-Catalyzed Reactions of Methane
Gerald S. Lane, Eduardo Miro, and Eduardo E. Wolf 161

Surface Characterization Study of the Reduction of an Air-Exposed Pt_3Sn Alloy, IV
Steven D. Gardner, Gar B. Hoflund, and David R. Schryer 179

An Infrared and Electrical Conductance Study of V_2O_5/SiO_2–TiO_2 Catalysts Active for the Reduction of NO by NH_3
Robert B. Bjorklund, C. U. Ingemar Odenbrand, Jan G. M. Brandin, Lars A. H. Andersson, and Bo Liedberg 187

Mechanism of Catalyzed Graphite Oxidation by Monolayer Channeling and Monolayer Edge Recession
Peter J. Goethel and Ralph T. Yang 201

Thermodynamics of H_2 Dissociation into Spilt-over Hydrogen over Pt/Transition Metal Oxide Systems
Xuehao Lin, J. F. Lambert, J. J. Fripiat, and C. Ancion 215

Molecular Approach to the Mechanisms of C–C Bond Formation and Cleavage on Metal Surfaces: Hydrogenolysis, Homologation, and Dimerization of Ethylene over Ru/SiO_2 Catalysts
Eloy Rodriguez, Michel Leconte, Jean-Marie Basset, and Katsumi Tanaka ... 230

Transient Kinetic Studies of the Catalytic Reduction of NO by CO on Platinum
B. A. Banse, D. T. Wickham, and B. E. Koel 238

Notes

Behavior of Lattice Oxygen in V_2O_5/MoO_3 Mixture and Catalyst
Zhen Xiang Liu, Kai Xie, Yu Qing Li, and Qi Xun Bao 249

Evidence of Brønsted Acidity on Sulfided Promoted and Unpromoted Mo/Al_2O_3 Catalysts
Nan-Yu Topsøe, Henrik Topsøe, and Frank E. Massoth 252

Evidence from XPS for the Stabilization of High-Valent Molybdenum by Addition of Potassium in Mo/Al_2O_3 Catalysts
Stephen J. DeCanio, Maurice C. Cataldo, Elaine C. DeCanio, and David A. Storm 256

A Neutron Powder Diffraction Analysis of Potassium-Exchanged Ferrierite
I. J. Pickering, P. J. Maddox, J. M. Thomas, and A. K. Cheetham 261

Letters to the Editors

On the Origin of an External Surface Barrier to Sorption in Microporous Solids: Reply to F. Vigné-Maeder
Eric G. Derouane, Laurence Leherte, Daniel P. Vercauteren, Amand A. Lucas, and Jean-Marie André 266

Stoichiometry for NO Reduction by NH_3
In-Sik Nam 269

Reply to the Letter of In-Sik Nam concerning the paper "Preparation and Performance of a Silica-Supported V_2O_5 on TiO_2 Catalyst for the Selective Reduction of NO with NH_3"
E. T. C. Vogt, A. J. van Dillen, J. W. Geus, F. J. J. G. Janssen, and F. van den Kerkhof 270

Time Dependence for the Selective Hydrogenation of Crotonaldehyde
Stephen S. Lawrence and John A. Schreifels 272

Reply to the Paper of Stephen S. Lawrence and John A. Schreifels
H. Noller and W. M. Lin 276

Structural, Surface, and Catalytic Properties of Bismuth Molybdovanadates Containing Foreign Atoms. IV. Surface Characterization and Redox Behaviour of Iron-Containing Bismuth Molybdovanadate Catalysts by X-Ray Photoelectron Spectroscopy
D. Gazzoli, A. Anichini, S. De Rossi, M. Inversi, M. Lo Jacono, P. Porta, and M. Valigi 277

Aromatics Formation from Alumina-Catalyzed Reactions of Methanol with Aliphatic and Alicyclic Carbonyl Compounds
K. Ganesan and C. N. Pillai 288

Role of Cu in the Deuterium Addition and Exchange of Propene over Pd–Cu and Pt–Cu Alloy Catalysts
Shuichi Naito and Mitsutoshi Tanimoto 300

An Infrared Spectroscopy Study of Carbon Monoxide Adsorption on α-Chromia Surfaces: Probing Oxidation States of Coordinatively Unsaturated Surface Cations
Mohamed I. Zaki and Helmut Knözinger 311

Carbon Deposition and Filament Growth on Fe, Co, and Ni Foils Using CH_4–H_2–H_2O–CO–CO_2 Gas Mixtures
A. Sacco, Jr., F. W. A. H. Geurts, G. A. Jablonski, S. Lee, and R. A. Gately 322

Methanol Adsorption and Decomposition on Rhodium
G.-K. Chuah, N. Kruse, W. A. Schmidt, J. H. Block, and G. Abend 342

Conversion of Cyclohexene over Y-Zeolites: A Model Reaction for Hydrogen Transfer
W-C. Cheng and K. Rajagopalan 354

The Formation of Ketones in the Presence of Carbon Monoxide over CuO/ZnO/Al_2O_3
D. J. Elliott and Filippo Pennella 359

ESR Evidence of Tetracoordinated Mo^{5+}_{4c} Species Formed on Reduced Mo/SiO_2 Catalysts Prepared by Impregnation
Ahmed Latef, Cossi Faustin Aissi, and Michel Guelton 368

The Influence of Sulfur and Carbonaceous Deposits on the Selectivity and Activity of Pt/Co Catalysts in Hydrocarbon Reactions
M. J. Dees and V. Ponec 376

Solid State Synthesis and Characterization of Model Hydrodesulfurization Catalysts
M. A. Villa Garcia, J. Lindner, A. Sachdev, and J. Schwank 388

Polyoxometallates as Models for Oxide Catalysts. Part I. An UV–Visible Reflectance Study of Polyoxomolybdates: Influence of Polyhedra Arrangement on the Electronic Transitions and Comparison with Supported Molybdenum Catalysts
Michel Fournier, Catherine Louis, Michel Che, Patrick Chaquin, and Daniel Masure 400

Polyoxometallates as Models for Oxide Catalysts. Part II. Theoretical Semi-empirical Approach to the Influence of the Inner and Outer Mo Coordination Spheres on the Electronic Levels of Polyoxomolybdates
Daniel Masure, Patrick Chaquin, Catherine Louis, Michel Che, and Michel Fournier 415

The Assay of Acid Sites on Zeolites as Measured by Ammonia Poisoning
Eduardo A. Lombardo, Gustave A. Sill, and W. Keith Hall 426

Ethane Hydrogenolysis over Well-Defined Ru–Cu/SiO_2 Catalysts
Mark W. Smale and Terry S. King 441

The Genesis of Carbon-Supported Fe–Mn and K–Fe–Mn Catalysts from Stoichiometric Metal Carbonyl Clusters. III. Characterization by Chemisorption, Calorimetry, and Kinetic Analysis
Jeremy J. Venter, Andrew A. Chen, Jonathan Phillips, and M. Albert Vannice 451

Isotopic Tracer and NMR Studies of Carbonaceous Species Present during CO Hydrogenation over Ru/TiO_2
G. H. Yokomizo and A. T. Bell 467

Mixed Reactant Photocatalysis: Intermediates and Mutual Rate Inhibition
Craig S. Turchi and David F. Ollis 483

Base Catalysis by Alkali Modified Zeolites. III. Alkylation with Methanol
Paul E. Hathaway and Mark E. Davis 497

Notes

Oscillations on Individual Catalytic Pellets in a Packed Bed: CO Oxidation on Pt/Al_2O_3
Jiří Kapička and Miloš Marek 508

Solid State NMR and IR Studies of Phosphomolybdenum and Phosphotungsten Heteropoly Acids Supported on SiO_2, γ-Al_2O_3, and SiO_2–Al_2O_3
K. Mohana Rao, R. Gobetto, A. Iannibello, and A. Zecchina 512

Competitive Hydrogenation of Butadiene and Butene on Palladium and Platinum Catalysts
T. Ouchaib, J. Massardier, and A. Renouprez 517

Reaction of Neopentane with Hydrogen over Pd/SiO_2
Z. Karpiński, J. B. Butt, and W. M. H. Sachtler 521

Comparison of the Acidity/Site Energy Distribution in Catalytically Important Zeolites
Vasant R. Choudhary and Deepak B. Akolekar 525

Studies of Molybdena–Alumina Catalysts. XVI. Effect of High-Temperature Sulfiding
J. Miciukiewicz and F. E. Massoth 531

The Effects of Pressure on the Hydrogenation of Benzene and Naphthalene over Reduced and Sulfided Molybdena–Alumina Catalysts
Akos Redey and W. Keith Hall 534

Author Index for Volume 119 538

NOTICE

The Subject Index for Volume 119 will appear in the December 1989 issue as part of a cumulative index for the year 1989.

INFORMATION FOR AUTHORS

The *Journal of Catalysis* publishes articles dealing with original studies in heterogeneous and homogeneous atalysis as well as studies relating catalytic properties with chemical processes at surfaces, studies of chemistry of urfaces, and engineering studies related to catalysis. All articles will be published in English.

Submission of Manuscripts. Manuscripts should be sent by registered mail to either of the Editors:

Professor Gary L. Haller
Department of Chemical Engineering
P.O. Box 2159 Yale Station
Yale University
New Haven, Connecticut 06520

Professor Frank S. Stone
School of Chemistry
University of Bath
Bath BA2 7AY, England

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the ame work has not been and will not be published nor is presently submitted elsewhere, and that its submission for ublication has been approved by all of the authors and by the institution where the work was carried out; further, hat any person cited as a source of personal communications has approved such citation. Written authorization ay be required at the Editor's discretion. Articles and any other material published in the *Journal of Catalysis* epresent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the ublisher.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the rticle, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the ublisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of is or her contributions to the journal.

Form of Manuscript. Manuscripts should be concise and consistent in style, spelling, and use of abbreviations. ubmit manuscript (in English) in triplicate, including the original typewritten copy, with copies of all figures and ables. All material (including tables, reference lists, etc.) should be typed double-spaced on one side of 8.5 × 11-n. white bond paper (with 1-in. margins on all sides). Each page of the manuscript should be numbered. *Page 1* hould contain the article title, authors' names (without degrees), affiliations, a running title (abbreviated form of itle) not exceeding 45 letters and spaces, and an address to which proof should be mailed. *Page 2* should contain a hort abstract.

Authors should use descriptive headings in this order: Abstract, Introduction, Methods, Results, Discussion, Acknowledgments, and References.

In the Methods section, authors should draw attention to any particular chemical or biological hazards that may e involved in carrying out the experiments described. Any relevant safety precautions should be described; if an ccepted code of practice has been followed, a reference to the relevant standards should be given.

Notes and *Letters to the Editor* may not exceed 8 double-spaced typewritten manuscript pages (including tables nd figures). Accepted Notes will not receive publication priority over articles.

Letters to the Editor will be considered for priority publication under the following conditions: (a) Letters must e related to some statement made in a recently published article in this Journal; (b) in cases of conflicting views on ny topic, no more than one Letter from each author will be accepted.

Units of weights, measures, etc., when used in conjunction with numerals should be abbreviated and unpunctu-ted (e.g., 10%, 50 ml, 3 g, 8 cm).

The SI (Systeme International) system of units will be accepted without editorial change. Authors using other nits are encouraged to define them in terms of SI units once in each publication, e.g., in an article where pressures re quoted in Torr to write "1 Torr = 133.3 N m^{-2}." For information concerning SI units, see *Quantities, Units nd Symbols for Physical Chemistry*, 4th ed., prepared by I. Mills and published by Blackwell Scientific, Oxford, 988.

Footnotes should be avoided if possible; but if essential, they should be designated by superscript Arabic umerals (starting with title) in the text.

Tables should be numbered with Arabic numerals in order of mention in the text. They should be typed double-paced on separate pages. Each table should have a short descriptive caption typed (double-spaced) above the able. Table footnotes (indicated by superscript, lowercase, italic letters) should be typed at the end of the table.

Figures should be numbered with Arabic numerals in order of mention in the text; each figure should have a escriptive legend. Legends should be typed double-spaced together on a separate page. All illustrations should be n finished form suitable for photoreproduction. No figures should exceed 8.5 × 11 in. (21 × 27.5 cm). Drawings hould be made with India ink on tracing linen, good quality tracing paper, smooth surface white paper, or Bristol oard. Graph paper if used should be ruled in blue. Grid lines that are to show in the final reproduction should be nked in black.

Copies of drawings are not acceptable unless they are high contrast glossy prints. All but the very simplest tructures and structural formulas must be designed for direct reproduction. Lettering should be large enough to be egible after a reduction of 50–60%. Illustrations in color can be accepted only if the authors defray the cost.

References to the literature should be cited in the text by italic Arabic numerals in parentheses, set on the text ne, and listed numerically at the end of the paper. Abbreviations of journal titles should follow the style used in *hemical Abstracts' Service Source Index*, 1985. Style and punctuation of references should be in accordance with ne following examples:

McVicker, G. B., Kramer, G. M., and Ziemiak, J. J., *J. Catal.* **83,** 286 (1983).

Klier, K., *in* "Advances in Catalysis" (D. D. Eley, H. Pines, and P. B. Weisz, Eds.), Vol. 31, p. 243. Academic Press, New York, 1982.

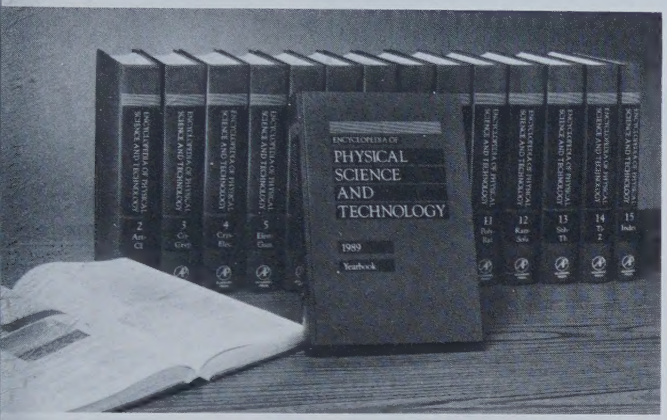
Pines, H., "The Chemistry of Catalytic Hydrocarbon Conversions." Academic Press, New York, 1981.

Proofs. Proofs will be sent to the author, with a reprint order form. Authors will be charged for alterations in xcess of 10% of the cost of composition.

Reprints. Fifty reprints without covers will be provided free of charge. Additional reprints may be purchased; an rder form will be included with proofs.

"...An awesome work of scholarship."

—CHICAGO TRIBUNE



Encyclopedia of Physical Science and Technology

itor-in-chief **Robert A. Meyers**
W, Inc., Redondo Beach, California

. . a landmark of specialized publishing, a massive magnum opus om one of the world's most distinguished spreaders of the scien- ic word . . . Its very presence is newsworthy and awesome, as is the t of its advisers and contributors, including Nobel laureates Linus uling, S. Chandrasekhar, Vladimir Prelog, Abdus Salam, Glenn aborg, Kai Siegbahn and Edward Teller."

—CHICAGO TRIBUNE

he short time since its publication, the **Encyclopedia of Physical Science d Technology** has become *the* contemporary scientific reference for today's nnology. From MIT to the Kennedy Space Center to IBM, thousands of academic, ustrial, and public libraries are finding that they can't be without this detailed, horitative, and comprehensive reference work.
7, 15-volume set including index, $2,500.00

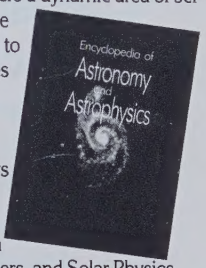
nnouncing the 989 Encyclopedia Yearbook

keep your set of the **Encyclopedia of Physical Science and Technology** most up-to-date reference for years to come, Academic Press will begin publish- yearbook volumes in December 1988. Each Yearbook will feature several articles mining new, fast-emerging areas of study or offering the latest information on cs already in the **Encyclopedia**.

8, 673 pages, $165.00/ ISBN: 0-12-226916-0

Encyclopedia of Astronomy and Astrophysics

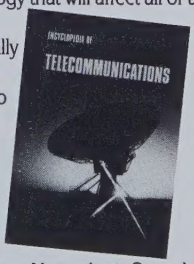
Accurate, up-to-date, and highly informative, the **Encyclopedia of Astronomy and Astrophysics** covers a dynamic area of science in one 770-page volume. Responding to the dramatic changes occurring in these fields, an array of expert practitioners present concise views of topics ranging from Cosmology and Cosmic Inflation to Pulsars, Star Clusters, and Solar Physics.



1988, 770 pages, $49.95/ISBN: 0-12-226690-0

Encyclopedia of Telecommunications

This authoritative, 550-page reference contains the latest advances in telecommunications technology—technology that will affect all of us during the next few decades. Internationally recognized experts have written articles to give you information on leading-edge research and engineering applications, on topics ranging from Fiber Optics to Intelligent and Computer Networks to Speech and Signal Processing.



1988, 550 pages, $49.95/ISBN: 0-12-226691-9

Journal of Differential Equations

Editor-in-Chief

Jack K. Hale

Georgia Institute of Technology, Atlanta

This journal is concerned with the theory and the application of differential equations. The **Journal of Differential Equations** publishes articles addressed not only to mathematicians, but also to those engineers, physicists, and other scientists for whom differential equations are valuable research tools.

Research Areas Include

- Mathematical control theory
- Ordinary differential equations
- Partial differential equations
- Related topics
- Stochastic differential equations
- Topological dynamics

Volumes 77–82 (1989), 12 issues
ISSN 0022-0396

In the U.S.A. and Canada: $618.00
All other countries: $728.00
